PROJECTS

Car Rental Management System

Developed a DBMS mini project using HTML, CSS, PHP and MySQL. This application helps the users to rent the cars on hourly & day basis. The users can book the cars & models based on their preferences.

Virtual File System

Developed a simple vfs using Python and linux commands, which can create, copy, move, modify, delete the directories & files.

Static web app Deployment

Wrote jenkins pipeline script for CI/CD and Deployed a simple web app on AWS EC2.

My Alumni

Developed an alumni portal based on microservices architecture, This platform helps both the alumni's and the institution to share each other stories & make them stay connected.

EXPERIENCE

DevOps Engineer intern at <u>loTloT.in</u>

- Server networking and firewall management using iptables & nft.
- Deployed 2 web-apps on docker container's & implemented load balancing using Nginx.

ACTIVITIES

- Coding and Audrino Club Coordinator.
- Bagged 2nd prize in college level poster presentation competition.
- Camera & Designing team coordinator for state level technical fest.
